

## **Professional Licensure Program Disclosure Policy**

In accordance with federal regulations outlined in 34 CFR § 668.43, the University of Sioux Falls, is committed to providing transparent information regarding our professional licensure programs. This policy is designed to ensure that prospective and current students have access to relevant details about our programs, particularly in relation to licensure and certification requirements.

### **Program Disclosure:**

The University of Sioux Falls offers professional licensure programs that prepare students for careers in fields requiring licensure or certification. As part of our commitment to compliance with federal regulations, we provide the following disclosures:

#### **1. Program and Licensure Information:**

The University of Sioux Falls offers programs designed to meet professional licensure and certification requirements in various fields. Detailed information about our programs, including objectives and potential career outcomes, is available on our website.

#### **2. State-by-State Disclosure, Authorization, and Licensing Status:**

We provide information on whether our programs meet the licensure requirements in each U.S. state and territory. This includes details on which states' licensure requirements are met by our programs and which are not. This information is updated regularly to reflect any changes in licensure requirements.

#### **3. Professional Licensure Requirements:**

We regularly update information about licensure requirements and ensure that it is accurate and reflects the most current regulations. Students are encouraged to discuss licensure requirements with program directors, advisors, and state licensure websites to ensure that our program meets all the expected requirements.

#### **4. Location of Learning:**

Students are required to verify their physical location for learning at the beginning of each semester to ensure that every student is in compliance with the policies outlined by NC-SARA and federal regulations.

The physical location of a student plays a crucial role in determining their eligibility for enrollment in programs that lead to licensure or certification. If a student resides in a state where the University of Sioux Falls does not meet or has not assessed the requirements for licensure or certification at the time of enrollment, they will not be admitted to the program unless they can attest that, upon completion of their degree program, it is their intention to work in a state where USF has confirmed licensure or certification eligibility.

**5. Contact Information:**

For questions or additional information about the licensure status of our programs, students and prospective students may contact Joe Obermueller, Vice President of Academic Affairs, at 605-331-6720. We are available to assist with any inquiries related to licensure requirements and program compliance.

**Disclaimer:**

While we strive to provide accurate and timely information, licensure requirements can change. It is the responsibility of students to verify with state licensing boards or other relevant authorities to ensure that the program will meet licensure requirements in their state or territory.

**Feedback and Updates:**

We value feedback from our students and the public. If you have any comments or need further clarification about our licensure programs or disclosures, please contact Joe Obermueller, Vice President of Academic Affairs by email at [joe.obermueller@siouxfalls.edu](mailto:joe.obermueller@siouxfalls.edu). We are committed to addressing your concerns and updating our information as necessary.
